Safety Instructions

For displays with glossy bezels the user should consider the placement of the display as the bezel may cause disturbing reflections from surrounding light and bright surfaces.

⚠ WARNING: Use of controls, adjustments, or procedures other than those specified in this documentation may result in exposure to shock, electrical hazards, and/or mechanical hazards.

For information on safety instructions, see the Safety, Environmental, and Regulatory Information (SERI).

About Your Monitor

Package Contents

Your monitor ships with the components shown below. Make sure that you have received all the components and [contact Dell](#) if something is missing.

 **NOTE:** Some items may be optional and may not ship with your monitor.
Some features or media may not be available in certain countries.

	Monitor
	Stand riser
	Stand base
	Power cable (varies by country)
	USB 3.0 upstream cable (enables the USB ports on the monitor)
	DP cable (DP to mDP)

- Quick Setup Guide
- Safety, Environmental, and Regulatory Information
- Factory Calibration Report

Product Features

The Dell UltraSharp UP3017A monitor has an active matrix, thinfilm transistor (TFT), liquid crystal display (LCD), and LED backlight. The monitor features include:

- 75.62 cm (30-inch) active area display (Measured diagonally) 2560 x 1600 (16:10 aspect ratio) resolution, plus full-screen support for lower resolutions.
- Tilt, swivel, pivot and vertical extension adjustment capabilities.
- Removable pedestal and Video Electronics Standards Association (VESA™) 100 mm mounting holes for flexible mounting solutions.
- Extensive digital connectivity with DP, mDP, HDMI, and USB 3.0 helps future-proof your monitor.
- Supports major color space standards for Adobe RGB, sRGB, REC709 and DCI-P3.
- Plug and play capability if supported by your system.
- Optimize eye comfort with a flicker-free screen and ComfortView feature which minimizes blue light emission.
- On-Screen Display (OSD) adjustments for ease of set-up and screen optimization.
- Supports DP 1.2 MST (also known as DP Daisy Chain) for multiple monitor setup.
- Security lock slot.
- Supports Asset Management Capability.
- Arsenic-Free glass and Mercury-Free for Panel only.
- Energy Gauge shows the energy level being consumed by the monitor in real time.
- ≤ 0.3 W in Standby Mode.

Identifying Parts and Controls

Front view

Label	Description
1	Function buttons (For more information, see Operating the Monitor)
2	Power on/off button (with LED indicator) Solid white light indicates the monitor is turned on and functioning normally. Blinking white light indicates the monitor is in Standby Mode.

Back View

Label	Description	Use
1	VESA mounting holes (100 mm x 100 mm-behind attached VESA cover)	Wall mount monitor using VESA-compatible wall mount kit (100 mm x 100 mm).
2	Regulatory label	Lists the regulatory approvals.
3	Stand release button	Release stand from monitor.
4	Security lock slot	Secures monitor with security cable lock (sold separately).
5	Barcode, serial number, and Service Tag label	Refer to this label if you need to contact Dell for technical support.
6	Dell soundbar mounting slots	Attaches the optional Dell soundbar. NOTE: Please remove the plastic strip covering the mounting slots before affixing the Dell Soundbar. Dell soundbar is sold separately.
7	Cable management slot	Use to organize cables by placing them through the slot.

Side View

Bottom View

Label	Description	Use
1	AC power connector	To connect the monitor power cable.
2	HDMI 1 connector	Connect your computer with HDMI cable (optional).
3	HDMI 2 connector	
4	DP connector (in)	Connect your computer with DP cable.
5	mDP connector (in)	Connect your computer with DP to mDP cable.
6	DP connector (out) 	DP output for MST (multi-stream transport) capable monitor. DP 1.1 monitor can only be connected as the last monitor in the MST chain. To enable MST, refer to instruction on section " Connecting the Monitor for DP MST Function ". NOTE: Remove the rubber plug when using the DP out connector.

7	Audio line-out port	Connect speakers to playback audio coming through HDMI or DP audio channels. Only supports 2-channel audio. NOTE: The audio line-out port does not support headphones. ⚠WARNING: Excessive sound pressure from earphones or headphones can cause hearing damage or loss.
8	USB upstream ports	Connect the USB cable that comes with your monitor to the computer. Once this cable is connected, you can use the USB downstream connectors on the monitor.
9	USB downstream ports	Connect your USB device. You can only use this connector after you have connected the USB cable to the computer and USB upstream connector on the monitor. Port with  battery icon supports BC 1.2.
10	Stand lock	Lock the stand to the monitor using a M3 x 6 mm screw (screw not included).

VESA, 2560 x 1600	98.71	59.97	268.5	+/-

MST Multi-Stream Transport (MST) Modes

MST Source Monitor	Maximum number of external Monitors that can be supported	
	2560 x 1600/60 Hz	1920 x 1200/60 Hz
2560 x 1600/60 Hz	1	2

NOTE: Maximum external monitor resolution supported is 2560 x 1600 60Hz only.

Electrical Specifications

Video input signals	<ul style="list-style-type: none">Digital video signal for each differential line. Per differential line at 100 ohm impedance.DP/HDMI signal input support
Input voltage/ frequency/ current	100-240 VAC / 50 or 60 Hz \pm 3 Hz / 1.6 A (maximum)
Inrush current	120 V: 30 A (Max.) 240 V: 60 A (Max.)
Power Consumption	0.2 W (Off Mode) ¹ 0.3 W (Standby Mode) ¹ 35.8 W (On Mode) ¹ 108 W (Max) ² $38.4 \text{ W (P}_{\text{on}}\text{)}^3$ 120.0 kWh (TEC) ³

¹As defined in EU 2019/2021 and EU 2019/2013.

²Max brightness and contrast setting with maximum power loading on all USB ports.

³P_{on}: Power consumption of On Mode measured with reference to Energy Star test method.

TEC: Total energy consumption in kWh measured with reference to Energy Star test method.

This document is informational only and reflects laboratory performance. Your product may perform differently, depending on the software, components and peripherals you ordered and shall have no obligation to update such information. Accordingly, the customer should not rely upon this information in making decisions about electrical tolerances or otherwise. No warranty as to accuracy or completeness is expressed or implied.

Physical Characteristics

Connector type	<ul style="list-style-type: none">• DP (HDCP 1.4) connector (include DP in and DP out)• mDP (HDCP 1.4) connector• HDMI (HDCP 1.4) connector• Audio line-out• USB 3.0 connector <p>(Port with  battery icon supports BC 1.2)</p>
Signal cable type (in-box)	DP to mDP, 1.8 M cable USB 3.0, 1.8 M cable
Dimensions (with stand)	
Height (extended)	632.3 mm (24.89 inches)
Height (compressed)	482.3 mm (18.99 inches)
Width	686.9 mm (27.04 inches)
Depth	217.0 mm (8.54 inches)
Dimensions (without stand)	
Height	447.1 mm (17.60 inches)
Width	686.9 mm (27.04 inches)
Depth	58.0 mm (2.28 inches)
Stand dimensions	
Height (extended)	478.2 mm (18.83 inches)
Height (compressed)	430.5 mm (16.95 inches)
Width	343.5 mm (13.52 inches)
Depth	217.0 mm (8.54 inches)
Weight	
Weight with packaging	13.10 kg (28.88 lb)
Weight with stand assembly and cables	9.59 kg (21.14 lb)
Weight without stand assembly (For wall mount or VESA mount considerations - no cables)	6.49 kg (14.31 lb)
Weight of stand assembly	2.81 kg (6.19 lb)
Front frame gloss	2~4 GU

Environmental Characteristics

Compliant Standards	
TCO Certified Display	yes
RoHS Compliant	yes
BFR/PVC Free monitor (excluding cables)	yes
Temperature	
Operating	0°C to 35°C (32°F to 95°F)
Non-operating	-20°C to 60°C (-4°F to 140°F)
Humidity	
Operating	10% to 80% (non-condensing)
Non-operating	5% to 90% (non-condensing)
Altitude	
Operating	5,000 m (16,404 ft) (maximum)
Non-operating	12,192 m (40,000 ft) (maximum)
Thermal dissipation	368.51 BTU/hour (maximum) 122.24 BTU/hour (On Mode)

Universal Serial Bus (USB)

This section gives you information about the USB ports available on your monitor.

 **NOTE:** Up to 2 A on USB downstream port (port with  battery icon) with BC 1.2 compliance devices; up to 0.9 A on the other 2 USB downstream ports.

Your computer has the following USB ports:

- 2 upstream - bottom
- 4 downstream - 2 at left side, 2 at bottom

Power Charging Port - the ports with  battery icon supports fast current charging capability if the device is BC 1.2 compatible.

 **NOTE:** The monitor's USB ports work only when the monitor is on or in the standby mode. If you turn off the monitor and then turn it on, the attached peripherals may take a few seconds to resume normal functionality.

Transfer speed	Data rate	Power consumption
SuperSpeed	5 Gbps	4.5 W (Max., each port)
Hi-Speed	480 Mbps	2.5 W (Max., each port)
Full speed	12 Mbps	2.5 W (Max., each port)

Plug-and-Play

You can install the monitor in any Plug-and-Play-compatible system. The monitor automatically provides the computer system with its extended display identification data (EDID) using display data channel (DDC) protocols so the computer can configure itself and optimize the monitor settings. Most monitor installations are automatic; you can select different settings if desired. For more information about changing the monitor settings, see [Operating the Monitor](#).

LCD Monitor Quality and Pixel Policy

During the LCD monitor manufacturing process, it is not uncommon for one or more pixels to become fixed in an unchanging state which are hard to see and do not affect the display quality or usability. For more information on LCD Monitor Pixel Policy, see Dell support site at: <http://www.dell.com/support/monitors>.

Ergonomics

△ **CAUTION:** Improper or prolonged usage of keyboard may result in injury.

△ **CAUTION:** Viewing the monitor screen for extended periods of time may result in eye strain.

For comfort and efficiency, observe the following guidelines when setting up and using your computer workstation:

- Position your computer so that the monitor and keyboard are directly in front of you as you work. Special shelves are commercially available to help you correctly position your keyboard.
- To reduce the risk of eye strain and neck/arm/back/shoulder pain from using the monitor for long periods of time, we suggest you to:
 1. Set the screen about 20 to 28 in. (50-70 cm) from your eyes.
 2. Blink frequently to moisten or rewet your eyes when working with the monitor.
 3. Take regular and frequent breaks for 20 minutes every two hours.
 4. Look away from your monitor and gaze at a distant object at 20 feet away for at least 20 seconds during the breaks.
 5. Perform stretches to relieve tension in the neck/arm/back/shoulders during the breaks.
- Make sure that the monitor screen is at eye level or slightly lower when you are sitting in front of the monitor.
- Adjust the tilt of the monitor, its contrast, and brightness settings.
- Adjust the ambient lighting around you (such as overhead lights, desk lamps, and the curtains or blinds on nearby windows) to minimize reflections and glare on the monitor screen.
- Use a chair that provides good lower-back support.
- Keep your forearms horizontal with your wrists in a neutral, comfortable position while using the keyboard or mouse.
- Always leave space to rest your hands while using the keyboard or mouse.
- Let your upper arms rest naturally on both sides.
- Ensure that your feet are resting flat on the floor.
- When sitting, make sure that the weight of your legs is on your feet and not on the front portion of your seat. Adjust your chair's height or use a footrest if necessary to maintain a proper posture.
- Vary your work activities. Try to organize your work so that you do not have to sit and work for extended periods of time. Try to stand or get up and walk around at regular intervals.

- Keep the area under your desk clear of obstructions and cables or power cords that may interfere with comfortable seating or present a potential trip hazard.

Handling and moving your display

To ensure the monitor is handled safely when lifting or moving it, follow the guidelines mentioned below:

- Before moving or lifting the monitor, turn off your computer and the monitor.
- Disconnect all cables from the monitor.
- Place the monitor in the original box with the original packing materials.
- Hold the bottom edge and the side of the monitor firmly without applying excessive pressure when lifting or moving the monitor.

- When lifting or moving the monitor, ensure the screen is facing away from you and do not press on the display area to avoid any scratches or damage.

- When transporting the monitor, avoid any sudden shock or vibration to it.

- When lifting or moving the monitor, do not turn the monitor upside down while holding the stand base or stand riser. This may result in accidental damage to the monitor or cause personal injury.

Maintenance guidelines

Cleaning your monitor

⚠ WARNING: Before cleaning the monitor, unplug the monitor power cable from the electrical outlet.

⚠ CAUTION: Read and follow the **Safety Instructions** before cleaning the monitor.

For best practices, follow these instructions in the list below while unpacking, cleaning, or handling your monitor:

- To clean your anti-static screen, lightly dampen a soft, clean cloth with water. If possible, use a special screen-cleaning tissue or solution suitable for the anti-static coating. Do not use benzene, thinner, ammonia, abrasive cleaners, or compressed air.
- Use a lightly-dampened, soft cloth to clean the monitor. Avoid using detergent of any kind as some detergents leave a milky film on the monitor.
- If you notice white powder when you unpack your monitor, wipe it off with a cloth.
- Handle your monitor with care as a darker-colored monitor may get scratched and show white scuff marks more than a lighter-colored monitor.
- To help maintain the best image quality on your monitor, use a dynamically changing screen saver and turn off your monitor when not in use.

Setting Up the Monitor

Attaching the Stand

-  **NOTE:** The stand riser and stand base are detached when the monitor is shipped from the factory.
-  **NOTE:** The procedure below is applicable for the default stand. If you purchased any other stand, see the documentation shipped with the stand to set it up.
-  **CAUTION:** Place monitor on a flat, clean, and soft surface to avoid scratching the display panel.

To attach the monitor stand:

- 1 Remove the monitor protective cover and place the monitor with its front facing downward on it.
- 2 Insert the two tabs on the upper part of the stand to the groove on the back of the monitor.
- 3 Press the stand down till it snaps into its place.

- Hold the stand base with the triangle mark ▲ facing upward.

- Align the stand base protruded blocks to the matching slot on the stand.
- Insert the stand base blocks fully into the stand slot.

- Lift the screw handle and turn the screw clockwise.
- After fully tightening the screw, fold the screw handle flat within the recess.

Using the Tilt, Swivel, and Vertical Extension

 **NOTE:** This is applicable for a monitor with a stand. If you purchased any other stand, refer to the respective stand setup guide for set up instructions.

Tilt, Swivel and Vertical Extension

With the stand attached to the monitor, you can tilt the monitor for the most comfortable viewing angle.

 **NOTE:** The stand is detached when the monitor is shipped from the factory.

Rotating the Monitor

Before you rotate the monitor, your monitor should be fully vertically extended and fully tilted up to avoid hitting the bottom edge of the monitor.

 **NOTE:** To use the Display Rotation function (Landscape versus Portrait view) with your Dell computer, you require an updated graphics driver that is not included with this monitor. To download the graphics driver, go to www.dell.com/support and see the Download section for Video Drivers for latest driver updates.

 **NOTE:** When in the Portrait View Mode, you may experience performance degradation in graphic-intensive applications (3D Gaming and etc.).

Adjusting the Rotation Display Settings of Your System

After you have rotated your monitor, you need to complete the procedure below to adjust the Rotation Display Settings of your System.

 **NOTE:** If you are using the monitor with a non-Dell computer, you need to go the graphics driver website or your computer manufacturer website for information on rotating the 'contents' on your display.

To adjust the Rotation Display Settings:

- 1 Right-click on the desktop and click Properties.
- 2 Select the Settings tab and click Advanced.
- 3 If you have an ATI graphics card, select the Rotation tab and set the preferred rotation.
- 4 If you have an nVidia graphics card, click the nVidia tab, in the left-hand column select NVRotate, and then select the preferred rotation.
- 5 If you have an Intel® graphics card, select the Intel graphics tab, click Graphic Properties, select the Rotation tab, and then set the preferred rotation.

 **NOTE:** If you do not see the rotation option or it is not working correctly, go to www.dell.com/support and download the latest driver for your graphics card.

Connecting Your Monitor

 **WARNING:** Before you begin any of the procedures in this section, follow the [Safety Instructions](#).

To connect your monitor to the computer:

- 1 Turn off your computer.
- 2 Connect the DP-mDP/HDMI/USB cable from your monitor to the computer. (Vertically extend and tilt the monitor completely to rotate it for cable connection. See [Rotating the Monitor](#).)
- 3 Switch on your monitor.
- 4 Select the correct input source at Monitor OSD Menu and turn on your computer.

 **NOTE:** UP3017A default setting is DP 1.2. A DP 1.1 Graphic card may not display normally. Please refer to "[product specific problems – No image when using DP connection to the PC](#)" to change default setting.

Single monitor connection

Connecting the DP (or mDP) cable

 **NOTE:** Default is DP port. Select input source on monitor to switch to mDP.

Connecting the HDMI cable (Optional)

Connecting the USB cable

After you have completed connecting the DP-mDP cables, follow the procedure below to connect the USB 3.0 cable to the computer and complete your monitor setup:

1 a. Connect one computer:

Connect the upstream USB 3.0 port (cable supplied) to an appropriate USB 3.0 port on your computer.

b. Connect two computers:

Connect the upstream USB 3.0 ports to appropriate USB 3.0 ports on the two computers. Then use the OSD menu to select between the two USB upstream sources and input sources. See [USB Select Switch](#).

 **NOTE:** When connecting two computers to the monitor, the monitor's USB downstream ports for the keyboard and mouse can be assigned to different input signals from the two computers by changing the **USB Selection** setting from the OSD menu. (See [USB Selection](#) for details)

- 2 Connect the USB 3.0 peripherals to the downstream USB 3.0 ports on the monitor.
- 3 Plug the power cables for your computer and monitor into nearby outlet.

a. Connect one computer

b. Connect two computers

- 4 Turn On the monitor and the computer.
If your monitor displays an image, installation is complete. If it does not display an image, see [Troubleshooting](#).

Multiple monitor connections

Connecting the monitor for DP Multi-Stream Transport (MST) function

NOTE: Supports the DP MST feature. To make use of this feature, your PC Graphics Card must be certified to DP1.2 with MST option.

NOTE: Remove the rubber plug when using the DP out connector.

Organizing Your Cables

After attaching all necessary cables to your monitor and computer, (see [Connecting Your Monitor](#) for cable attachment) organize all cables as shown above.

Removing the Monitor Stand

 **CAUTION:** To prevent scratches on the LCD screen while removing the stand, make sure that the monitor is placed on a soft, clean surface.

 **NOTE:** The procedure below is applicable for the default stand. If you purchased any other stand, see the documentation shipped with the stand to set it up.

To remove the stand:

- 1 Place the monitor on a soft cloth or cushion.
- 2 Press and hold the stand-release button.
- 3 Lift the stand up and away from the monitor.

Wall Mounting (Optional)

NOTE: Use M4 x 10 mm screws to connect the monitor to the wall-mounting kit. Refer to the instructions that come with the VESA-compatible wall mounting kit.

- 1 Place the monitor on a soft cloth or cushion on a stable, flat table.
- 2 Remove the stand.
- 3 Use a Phillips crosshead screwdriver to remove the four screws securing the plastic cover.
- 4 Attach the mounting bracket from the wall mounting kit to the monitor.
- 5 Mount the monitor on the wall by following the instructions that comes with the wall mounting kit.

NOTE: For use only with UL or CSA or GS-listed wall mount bracket with minimum weight/load bearing capacity of 6.49 kg (14.31 lb).

Operating the Monitor

Turning on the Monitor

Press the  button to turn on the monitor.

Using the Front Panel Controls

Use the control buttons on the front of the monitor to adjust the characteristics of the image being displayed. As you use these buttons to adjust the controls, an OSD shows the numeric values of the characteristics as they change.

The following table describes the front panel buttons:

Front-Panel Button	Description
1  Shortcut key: Preset Modes	Use this button to choose from a list of preset color modes.
2  Shortcut key: Brightness/Contrast	Use this button to directly access the "Brightness/Contrast" menu.
3  Shortcut key: Input Source	Use this button to choose from a list of Input Source.
4  Menu	Use this menu button to launch the on-screen display (OSD) and select the OSD menu. See Accessing the Menu System .
5  Exit	Use this button to go back to the main menu or exit the OSD main menu.
6  Power button (with power-status light)	To turn the monitor on or off. Solid white light indicates the monitor is turned on and functioning normally. Blinking white light indicates the monitor is in Standby Mode.

Front-Panel Button

Use the buttons on the front of the monitor to adjust the image settings.

Front Panel Button	Description
1 Up Down	Use the Up (increase) and Down (decrease) keys to adjust items in the OSD menu.
2 OK	Use the OK button to confirm your selection.
3 Back	Use the Back button to go back to the previous menu.

Using the On-Screen Display (OSD) Menu

Accessing the Menu System

 **NOTE:** Any changes you make using the OSD menu are automatically saved if you move to another OSD menu, exit the OSD menu, or wait for the OSD menu to disappear.

- 1 Press the  button to launch the OSD menu and display the main menu.

- 2 Press the  and  buttons to move between options. As you move from one icon to another, the option name is highlighted.
- 3 Press the  or  or  button once to activate the highlighted option.
- 4 Press the  and  buttons to select the desired parameter.
- 5 Press  to enter the slide bar and then use the  or  button, according to the indicators on the menu, to make your changes.
- 6 Select the  to return to previous menu or  to accept and return to previous menu.

Icon	Menu and Submenus	Description
	Brightness/Contrast	<p>Use this menu to activate Brightness/Contrast adjustment.</p> 
	Brightness	<p>Brightness adjusts the luminance of the backlight (minimum 0; maximum 100).</p> <p>Press the  button to increase brightness.</p> <p>Press the  button to decrease brightness.</p> <p>NOTE: Manual adjustment of Brightness is disabled when Dynamic Contrast is switched on.</p>
	Contrast	<p>Adjust the Brightness first, and then adjust Contrast only if further adjustment is necessary.</p> <p>Press the  button to increase contrast and press the  button to decrease contrast (between 0 and 100).</p> <p>Contrast adjusts the difference between darkness and lightness on the monitor.</p>
	Input Source	<p>Use the Input Source menu to select between different video inputs that are be connected to your monitor.</p> 

Icon	Menu and Submenus	Description																																				
	DP	Select DP input when you are using the DP (DisplayPort) connector. Use  to select the DP input source.																																				
	mDP	Select mDP input when you are using the mDP (mini DisplayPort) connector. Use  to select the mDP input source.																																				
	HDMI 1	Select the HDMI 1 input when you are using the HDMI connector. Use  to select the HDMI 1 input source.																																				
	HDMI 2	Select the HDMI 2 input when you are using the HDMI connector. Use  to select the HDMI 2 input source.																																				
	Auto Select	Use  to select Auto Select , the monitor scans for available input sources.																																				
	Reset Input Source	Resets your monitor's Input Source settings to the factory defaults.																																				
	Color	Use the Color menu to adjust the color setting mode.

	Preset Mode	<p>When you select Preset Modes, you can choose Standard, ComfortView, Multimedia, Movie, Game, Color Temp., Color Space, or Custom Color from the list.</p> 

- **Standard:** Default color settings. This is the default preset mode.
- **ComfortView:** Decreases the level of blue light emitted from the screen to make viewing more comfortable for your eyes.
- **Multimedia:** Ideal for multimedia applications.
- **Movie:** Ideal for movies.
- **Game:** Ideal for most gaming applications.
- **Color Temp.:** The screen appears warmer with a red/yellow tint with slider set at 5,000K or cooler with blue tint with slider set at 10,000K.

Icon	Menu and Submenus	Description
<p>• Color Space: Allows users to select the color space: Adobe RGB, sRGB, REC709, DCI-P3, CAL1, CAL2.</p>  <p>The screenshot shows the Dell UltraSharp UP3017A's on-screen menu. The main menu has icons for Brightness/Contrast, Input Source, Color, Display, PIP/PBP, USB Selection, Audio, Energy, Menu, Personalize, and Others. The 'Color' option is selected. On the right, under 'Preset Modes', 'Adobe RGB' is checked. Other modes listed are sRGB, REC709, DCI-P3, CAL1 (with a date field), and CAL2 (with a date field). At the bottom, it says 'Resolution : 2560x1600, 60Hz'. Navigation keys (^, v, <, >) are visible at the bottom right.</p>		

- **Adobe RGB:** This mode is compatible with Adobe RGB (99% coverage).
- **sRGB:** Emulates 99% sRGB.
- **REC709:** This mode matches 99% REC709 standard.
- **DCI-P3:** This mode reproduces 99% of DCI-P3 digital cinema color standard.
- **CAL1/CAL2:** User calibrated preset mode using Dell Ultrasharp Color Calibration Software or other Dell approved software. Dell Ultrasharp Color Calibration Software works with the X-rite colorimeter i1Display Pro. The i1Display Pro can be purchased from the Dell Electronics, Software and Accessories website.

NOTE: Accuracy of **sRGB, Adobe RGB, REC709, DCI-P3, CAL1** and **CAL2** are optimized for RGB input color format.

NOTE: Factory Reset will remove all calibrated data in **CAL1** and **CAL2**.

NOTE: YYYY-MM-DD depicts last calibration date. If this space is blanked it means no calibration was saved.

Icon	Menu and Submenus	Description
<ul style="list-style-type: none"> • Custom Color: Allows you to manually adjust the color settings. Press the  and  buttons to adjust the Red, Green, and Blue values and create your own preset color mode. <p>Use the  and  buttons to select the Gain, Offset, Hue, Saturation.</p>  <pre> graph TD CC[Custom Color] --> Gain[Gain] Gain --> Offset[Offset] Gain --> Hue[Hue] Gain --> Saturation[Saturation] </pre> <p></p> <ul style="list-style-type: none"> – Gain: Select it to adjust input RGB signal gain level (default value are 100). – Offset: Select it to adjust RGB black-level offset value (default value are 50) to control your monitor base color. – Hue: Select it to adjust RGBCMY hue value individually (default value are 50). – Saturation: Select it to adjust RGBCMY saturation value individually (default value are 50). 		

Icon	Menu and Submenus	Description
	Input Color Format	<p>Allows you to set the video input mode to:</p> <p>RGB: Select this option if your monitor is connected to a computer (or DVD player) using the HDMI or DP-mDP cable.</p> <p>YPbPr: Select this option if your DVD player supports only YPbPr output.</p>
		
Gamma	Allows you to set the display Gamma according to your system.	
Hue	Use  or  to adjust the hue from 0 to 100.	
	NOTE: Hue adjustment is available only for Movie and Game mode.	
Saturation	Use  or  to adjust the saturation from 0 to 100.	
	NOTE: Saturation adjustment is available only for Movie and Game mode.	
Reset Color	Resets your monitor's color settings to the factory defaults.	

Icon	Menu and Submenus	Description
	Display	Use the Display menu to adjust image.
		
Aspect Ratio	Adjust the image ratio to Wide 16:10, Auto Resize, 4:3, or 1:1 .	
Monitor Sleep	Sleep After Timeout: Monitor goes into sleep after timeout. Never: Monitor never goes into sleep.	
Sharpness	Makes the image look sharper or softer. Use  or  to adjust the sharpness from '0' to '100'.	
Dynamic Contrast	Allows you to increase the level of contrast to provide sharper and more detailed image quality. Push the  button to select the Dynamic Contrast "On" or "Off". NOTE: For Game and Movie preset mode only. NOTE: Dynamic Contrast provides higher contrast if you select Game or Movie preset mode.	
Response Time	Allows you to set the Response Time to Normal or Fast .	
MST	DP Multi Stream Transport, Set to ON enables MST(DP out), Set to OFF disables MST function.	
Uniformity Compensation	Select screen brightness and color uniformity compensation settings. Off is factory setting by default. Uniformity Compensation adjusts different areas of the screen with respect to the center to achieve uniform brightness and color over the entire screen.	
Display Info	Displays the monitor's current settings.	
Reset Display	Restores the display settings to factory defaults.	

Icon	Menu and Submenus	Description
	PIP/PBP	<p>This function brings up a window displaying image from another input source. Thus you can watch two images from different sources at the same time.</p>

Main Window	Sub - Window			
	DP	mDP	HDMI 1	HDMI 2

OSD Warning Messages

When the **Dynamic Contrast** feature is enabled (in these preset modes: **Game** or **Movie**), manual brightness adjustment is disabled.

Dell UltraSharp UP3017A

To allow manual adjustment of brightness, the Dynamic Contrast will be switched off.

Do you want to continue?

No

Yes

When the monitor does not support a particular resolution mode, you can see the following message:

Dell UltraSharp UP3017A

The current input timing is not supported by the monitor display. Please change your input timing to [2560x1600, 60Hz](#) or any other monitor listed timing as per the monitor specifications.

This means that the monitor cannot synchronize with the signal that it is receiving from the computer. See [Monitor Specifications](#) for the Horizontal and Vertical frequency ranges addressable by this monitor. Recommended mode is 2560 x 1600.

You can see the following message before the DDC/CI function is disabled:

Dell UltraSharp UP3017A

The function of adjusting display setting using PC application will be disabled.

Do you wish to disable DDC/CI function?

No

Yes

When the monitor enters the **Standby** mode, the following message appears:

Activate the computer and wake up the monitor to gain access to the [OSD](#).

If you press any button other than the power button, the following messages will appear depending on the selected input:

If either DP, mDP, HDMI1 or HDMI2 input is selected and the corresponding cable is not connected, a floating dialog box as shown below appears.

Or

Or

Dell UltraSharp UP3017A

  No HDMI1 Cable

The display will go into Standby Mode in 4 minutes.

www.dell.com/support/monitors

Or

Dell UltraSharp UP3017A

  No HDMI2 Cable

The display will go into Standby Mode in 4 minutes.

www.dell.com/support/monitors

Select OSD items of **On in Standby Mode** in Energy feature, the following message will appear:

Dell UltraSharp UP3017A

Changing to this setting (without  symbol) will Increase power consumption, Do you want to continue?

No

Yes

If adjust the Brightness level above the default level over 75%, the following message will appear:

Dell UltraSharp UP3017A

Adjusting to this value will increase power consumption above the default level.

Do you want to continue?

No

Yes

See [Troubleshooting](#) for more information.

Setting the maximum resolution

To set the maximum resolution for the monitor:

In Windows 7, Windows 8 or Windows 8.1:

1. For Windows 8 or Windows 8.1 only, select the Desktop tile to switch to classic desktop. For Windows Vista and Windows 7, skip this step.
2. Right-click on the desktop and click **Screen Resolution**.
3. Click the Dropdown list of the **Screen Resolution** and select **2560 x 1600**.
4. Click **OK**.

In Windows 10:

1. Right-click on the desktop and click **Display Settings**.
2. Click **Advanced display settings**.
3. Click the dropdown list of **Resolution** and select **2560 x 1440**.
4. Click **Apply**.

If you do not see **2560 x 1600** as an option, you may need to update your graphics driver. Depending on your computer, complete one of the following procedures:

If you have a Dell desktop or portable computer:

- Go to <http://www.dell.com/support>, enter your service tag, and download the latest driver for your graphics card.

If you are using a non-Dell computer (laptop or desktop):

- Go to your computer manufacturer's support website and download the latest graphic drivers.
- Go to your graphics card manufacturer's website and download the latest graphic drivers.

Troubleshooting

⚠ WARNING: Before you begin any of the procedures in this section, follow the [Safety Instructions](#).

Self-Test

Your monitor provides a self-test feature that allows you to check whether your monitor is functioning properly. If your monitor and computer are properly connected but the monitor screen remains dark, run the monitor self-test by performing the following steps:

- 1 Turn off both your computer and the monitor.
- 2 Unplug the video cable from the back of the computer. To ensure proper Self-Test operation, remove all digital and the analog cables from the back of computer.
- 3 Turn on the monitor.

The floating dialog box should appear on-screen (against a black background), if the monitor cannot sense a video signal and is working correctly. While in self-test mode, the power LED remains white. Also, depending upon the selected input, one of the dialogs shown below will continuously scroll through the screen.

Or

Or

Or

- 4 This box also appears during normal system operation, if the video cable becomes disconnected or damaged.
- 5 Turn off your monitor and reconnect the video cable; then turn on both your computer and the monitor.

If your monitor screen remains blank after you use the previous procedure, check your video controller and computer, because your monitor is functioning properly.

Built-in Diagnostics

Your monitor has a built-in diagnostic tool that helps you determine if the screen abnormality you are experiencing is an inherent problem with your monitor, or with your computer and video card.

 **NOTE:** You can run the built-in diagnostics only when the video cable is unplugged and the monitor is in self-test mode.

To run the built-in diagnostics:

- 1 Make sure that the screen is clean (no dust particles on the surface of the screen).
- 2 Unplug the video cable(s) from the back of the computer or monitor. The monitor then goes into the self-test mode.
- 3 Press and hold **Button 1** for 5 seconds. A gray screen appears.
- 4 Carefully inspect the screen for abnormalities.
- 5 Press **Button 1** on the front panel again. The color of the screen changes to red.
- 6 Inspect the display for any abnormalities.
- 7 Repeat steps 5 and 6 to inspect the display in green, blue, black, white, and text screens.

The test is complete when the text screen appears. To exit, press **Button 1** again. If you do not detect any screen abnormalities upon using the built-in diagnostic tool, the monitor is functioning properly. Check the video card and computer.

Common Problems

The following table contains general information about common monitor problems you might encounter and the possible solutions:

Common Symptoms	What You Experience	Possible Solutions
No Video/Power LED off	No picture	<ul style="list-style-type: none">• Ensure that the video cable connecting the monitor and the computer is properly connected and secure.• Verify that the power outlet is functioning properly using any other electrical equipment.• Ensure that the power button is depressed fully.• Ensure that the correct input source is selected in the Input Source menu.
No Video/Power LED on	No picture or no brightness	<ul style="list-style-type: none">• Increase brightness & contrast controls via OSD.• Perform monitor self-test feature check.• Check for bent or broken pins in the video cable connector.• Run the built-in diagnostics.• Ensure that the correct input source is selected in the Input Source menu.
Missing Pixels	LCD screen has spots	<ul style="list-style-type: none">• Cycle power on-off.• Pixel that is permanently off is a natural defect that can occur in LCD technology.• For more information on Dell Monitor Quality and Pixel Policy, see Dell Support site at: http://www.dell.com/support.monitors.
Stuck-on Pixels	LCD screen has bright spots	<ul style="list-style-type: none">• Cycle power On-Off.• Pixel that is permanently off is a natural defect that can occur in LCD technology.• For more information on Dell Monitor Quality and PixelPolicy, see Dell Support site at: http://www.dell.com/support.monitors.
Brightness Problems	Picture too dim or too bright	<ul style="list-style-type: none">• Reset the monitor to factory settings.• Adjust brightness & contrast controls via OSD.
Safety Related Issues	Visible signs of smoke or sparks	<ul style="list-style-type: none">• Do not perform any troubleshooting steps.• Contact Dell immediately.
Intermittent Problems	Monitor malfunctions on & off	<ul style="list-style-type: none">• Ensure that the video cable connecting the monitor to the computer is connected properly and is secure.• Reset the monitor to factory settings.• Perform monitor self-test feature check to determine if the intermittent problem occurs in self-test mode.

Common Symptoms	What You Experience	Possible Solutions
Missing Color	Picture missing color	<ul style="list-style-type: none"> Perform monitor self-test. Ensure that the video cable connecting the monitor to the computer is connected properly and is secure. Check for bent or broken pins in the video cable connector.
Wrong Color	Picture color not good	<ul style="list-style-type: none"> Change the settings of the Preset Modes in the Color menu OSD depending on the application. Adjust R/G/B value under Custom. Color in Color menu OSD. Change the Input Color Format to PC RGB or YPbPr in the Color menu OSD. Run the built-in diagnostics.
Image retention from a static image left on the monitor for a long period of time	Faint shadow from the static image displayed appears on the screen	<ul style="list-style-type: none"> Set the screen to turn off after a few minutes of screen idle time. These can be adjusted in Windows Power Options or Mac Energy Saver setting. Alternatively, use a dynamically changing screensaver.

Product Specific Problems

Specific Symptoms	What You Experience	Possible Solutions
Screen image is too small	Image is centered on screen, but does not fill entire viewing area	<ul style="list-style-type: none"> Check the Aspect Ratio setting in the Display menu OSD. Reset the monitor to factory settings.
Cannot adjust the monitor with the buttons on the front panel	OSD does not appear on the screen	<ul style="list-style-type: none"> Turn off the monitor, unplug the monitor power cable, plug it back, and then turn on the monitor. Check whether the OSD menu is locked. If yes, press and hold the button beside the power button for 6 seconds to unlock (for more information, see Lock).
No Input Signal when user controls are pressed	No picture, the LED light is white	<ul style="list-style-type: none"> Check the signal source. Ensure the computer is not in the power saving mode by moving the mouse or pressing any key on the keyboard. Check whether the signal cable is plugged in properly. Re-plug the signal cable if necessary. Reset the computer or video player.

Specific Symptoms	What You Experience	Possible Solutions
The picture does not fill the entire screen	The picture cannot fill the height or width of the screen	<ul style="list-style-type: none"> • Due to different video formats (aspect ratio) of DVDs, the monitor may display in full screen. • Run the built-in diagnostics.
No image when using DP connection to the PC	Black screen	<ul style="list-style-type: none"> • Verify which DP standard (DP 1.1a or DP 1.2) is your Graphics Card certified to. Download and install the latest graphics card driver. • Some DP 1.1a graphics card cannot support DP 1.2 monitors. Go to OSD menu, under Input Source selection, press and hold DP select  key for 8 sec to change the monitor setting from DP 1.2 to DP 1.1a.

Universal Serial Bus (USB) Specific Problems

Specific Symptoms	What You Experience	Possible Solutions
USB interface is not working	USB peripherals are not working	<ul style="list-style-type: none"> • Check that your monitor is turned ON. • Reconnect the upstream cable to your computer. • Reconnect the USB peripherals (downstream connector). • Switch off and then turn on the monitor again. • Reboot the computer. • Some USB devices like external portable HDD require higher electric current; connect the device directly to the computer system.
Supre Speed USB 3.0 interface is slow.	Super Speed USB 3.0 peripherals working slowly or not working at all	<ul style="list-style-type: none"> • Check that your computer is USB 3.0-capable. • Some computers have USB 3.0, USB 2.0, and USB 1.1 ports. Ensure that the correct USB port is used. • Reconnect the upstream cable to your computer. • Reconnect the USB peripherals (downstream connector). • Reboot the computer.
Wireless USB peripherals stop working when a USB 3.0 device is plugged in	Wireless USB peripherals responding slowly or only working as the distance between itself and its receiver decreases	<ul style="list-style-type: none"> • Increase the distance between the USB 3.0 peripherals and the wireless USB receiver. • Position your wireless USB receiver as close as possible to the wireless USB peripherals. • Use a USB-extender cable to position the wireless USB receiver as far away as possible from the USB 3.0 port.

FCC Notices (U.S. only) and Other Regulatory Information

For FCC notices and other regulatory information, see the regulatory compliance website located at www.dell.com/regulatory_compliance.

Contacting Dell

For customers in the United States, call 800-WWW-DELL (800-999-3355).

 **NOTE:** If you do not have an active Internet connection, you can find contact information on your purchase invoice, packing slip, bill, or Dell product catalog. Dell provides several online and telephone-based support and service options. Availability varies by country and product, and some services may not be available in your area.

To get online Monitor support content:

See www.dell.com/support/monitors.

To contact Dell for sales, technical support, or customer service issues:

- 1 Go to www.dell.com/support.
- 2 Verify your country or region in the Choose A Country/Region drop-down menu at the top-left corner of the page.
- 3 Click **Contact Us** next to the country dropdown.
- 4 Select the appropriate service or support link based on your need.
- 5 Choose the method of contacting Dell that is convenient for you.
